

Milk Jug Funnel

Submitted by Rich Fowler

December 2005

Make a handy funnel to add water, etc. to the fresh water tank using a section cut out of a half-gallon plastic milk carton. It is great when you need to add a bit of bleach to freshen up a water system or when you need to add just a gallon or two of water to the fresh water tank.

APPROX. MODIFICATION TIME: .25 hours

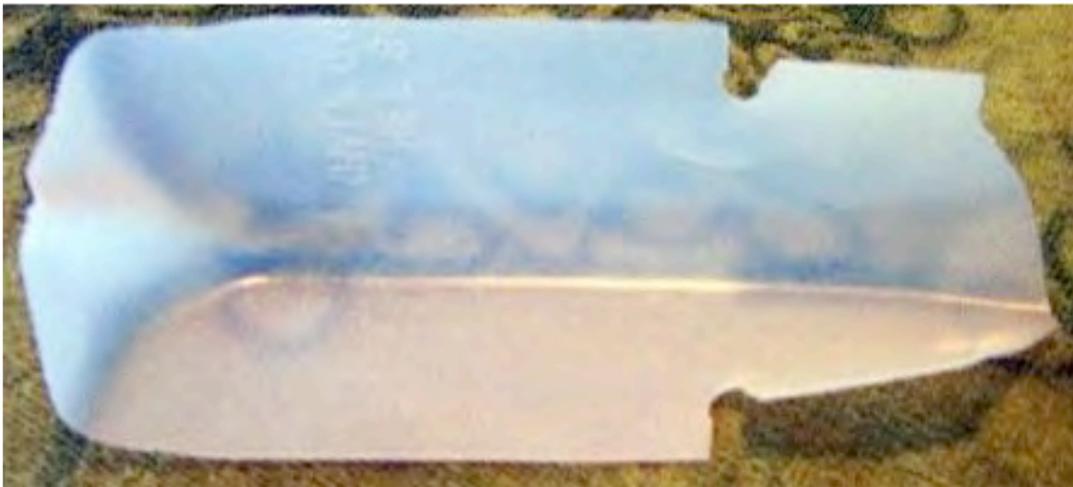

PARTS LIST: All prices are approximate, pre-tax, and pre-shipping.

[1] half gallon plastic milk jug	\$0
[2] scissors or cutting tool	\$0
APPROX. TOTAL COST OF PARTS	~\$0

INSTRUCTIONS:

Slice and dice as per the photos.

The smaller but wider funnel has relief slots on each side, which provide a slightly larger target for liquid, and the relief slots help insure the funnel is positioned well.
