Warranty

Subject: California Emissions Warranties

Number: V 99-07

Date: 3/16/1999

The following classes of vehicles are covered by VWoA's California Emission Warranties:

- Vehicles certified for sale in California and first sold and registered in California, Massachusetts as of model year 1995 or Vermont as of model year 1999.
- **Vehicles certified for sale in California which are first sold and registered in a state other than California, Massachusetts as of model year 1995 or Vermont as of model year 1999, and later registered in California, Massachusetts as of model year 1995 or Vermont as of model year 1999.** The warranty coverage for this class of vehicles commences on the date such vehicle is registered in California, Massachusetts as of model year 1995 or Vermont as of model year 1999 and ceases upon termination of the registration in these three states.
- **Vehicles certified for sale in California which are first sold by an authorized dealer outside California, Massachusetts as of model year 1995 or Vermont as of model year 1999 for first use and registration in California, Massachusetts as of model year 1995 or Vermont as of model year 1999.** The warranty coverage for this class of vehicles commences on the date of registration of the vehicle in California, Massachusetts as of model year 1995 or Vermont as of model year 1999 and does not cease upon re-registration outside these three states.

Note 1: A vehicle certified for California can be identified by inspecting the Emission Control Information Label located visibly in the engine compartment and confirming that the label includes a statement of certification to California regulations.

Note 2: Vehicles not certified for California may not be legally sold in California, Massachusetts or Vermont and are not covered by VWoA's California emission warranties even if they are registered in these three states.

This clarification of VWoA's policy concerning California emissions warranty coverage is effective immediately and will be contained in the next update of the 1999 Warranty Policies and Procedures Manual.
