

Technical Bulletin

Subject: Transmission Case, Sealing

Group: 34

Number: 97-06

Model(s): All with 020 transmission

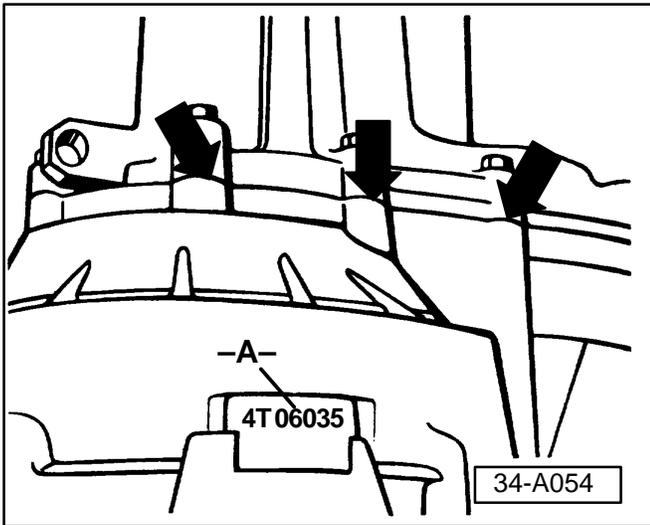

m.y. All

Date: Nov. 10, 1997

Production

As of transmission build date 06035, Most transmission cases have been sealed using sealant AMV188 200 03 instead of a paper gasket between case halves at -arrows-.

Code letters and date of manufacture -A-.

Example:	4T	06	03	5
	Transmission code letters	Day	Month	Year
	Date (e.g. 06 Mar.,1995)			

Service

You may encounter instances after this transmission build date, where a paper gasket Part No: 020 301 191F has been used.

CAUTION!

Pre-load adjustment on bearings will be affected if correct sealing method is not used.

DO NOT install a paper gasket when a transmission has been sealed with sealant.

DO NOT use sealant AMV188 200 03 on transmission that has been sealed with a paper gasket.

CAUTION!

Part numbers are for reference only. Always check with your Parts Dept. for the latest parts information.
