Technical Bulletin

Subject: Heating and Ventilation Controls, Replacing Fresh Air
Control Lever Light -L16-

Group: 85

Number: 99-02

Model(s): All with Manual Heating/Ventilation
Controls

1998 ► 2000

Date: Dec. 9, 1999

Supersedes T.B. Group 85 number 99-01 dated Mar. 26, 1999

Superseded due to Part Number addition.

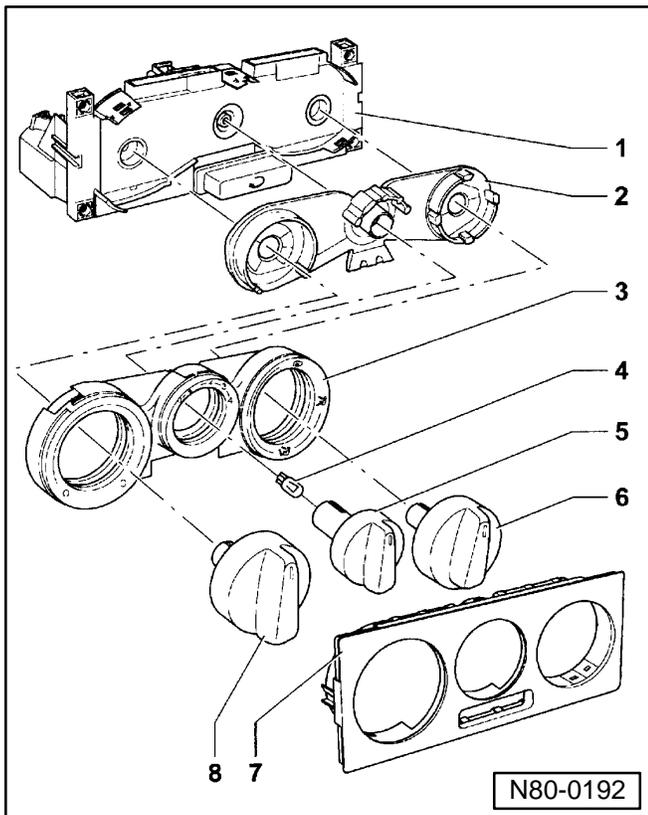

Condition

Heating and ventilation control assemblies
replaced due to inoperative fresh air control
lever light -L16-.

Service

DO NOT replace entire control assembly.
Replace lever light as follows:

- ◀ - Remove fan speed control knob -5- using
pliers with suitable plastic or rubber
protection on jaws (note position of knob).
- Remove bulb -4- using a piece of rubber
hose approx. 4mm inner dia. (press hose
onto bulb far enough to grip bulb and
remove).
- Install new bulb Part No: N 017 751 2 (press
into hose only slightly, then install into bulb
socket).

CAUTION!

**Part numbers are for reference only.
Always check with your Parts Dept. for
the latest parts information.**

- Turn on vehicle lights and check operation of
bulb.
- Reinstall fan speed control knob -5- in same
position as removed (check operation).

Note:

*Heating and ventilation control assemblies
replaced for inoperative fresh air control lever
light will NOT be approved for Warranty
reimbursement.*
