

DANGER

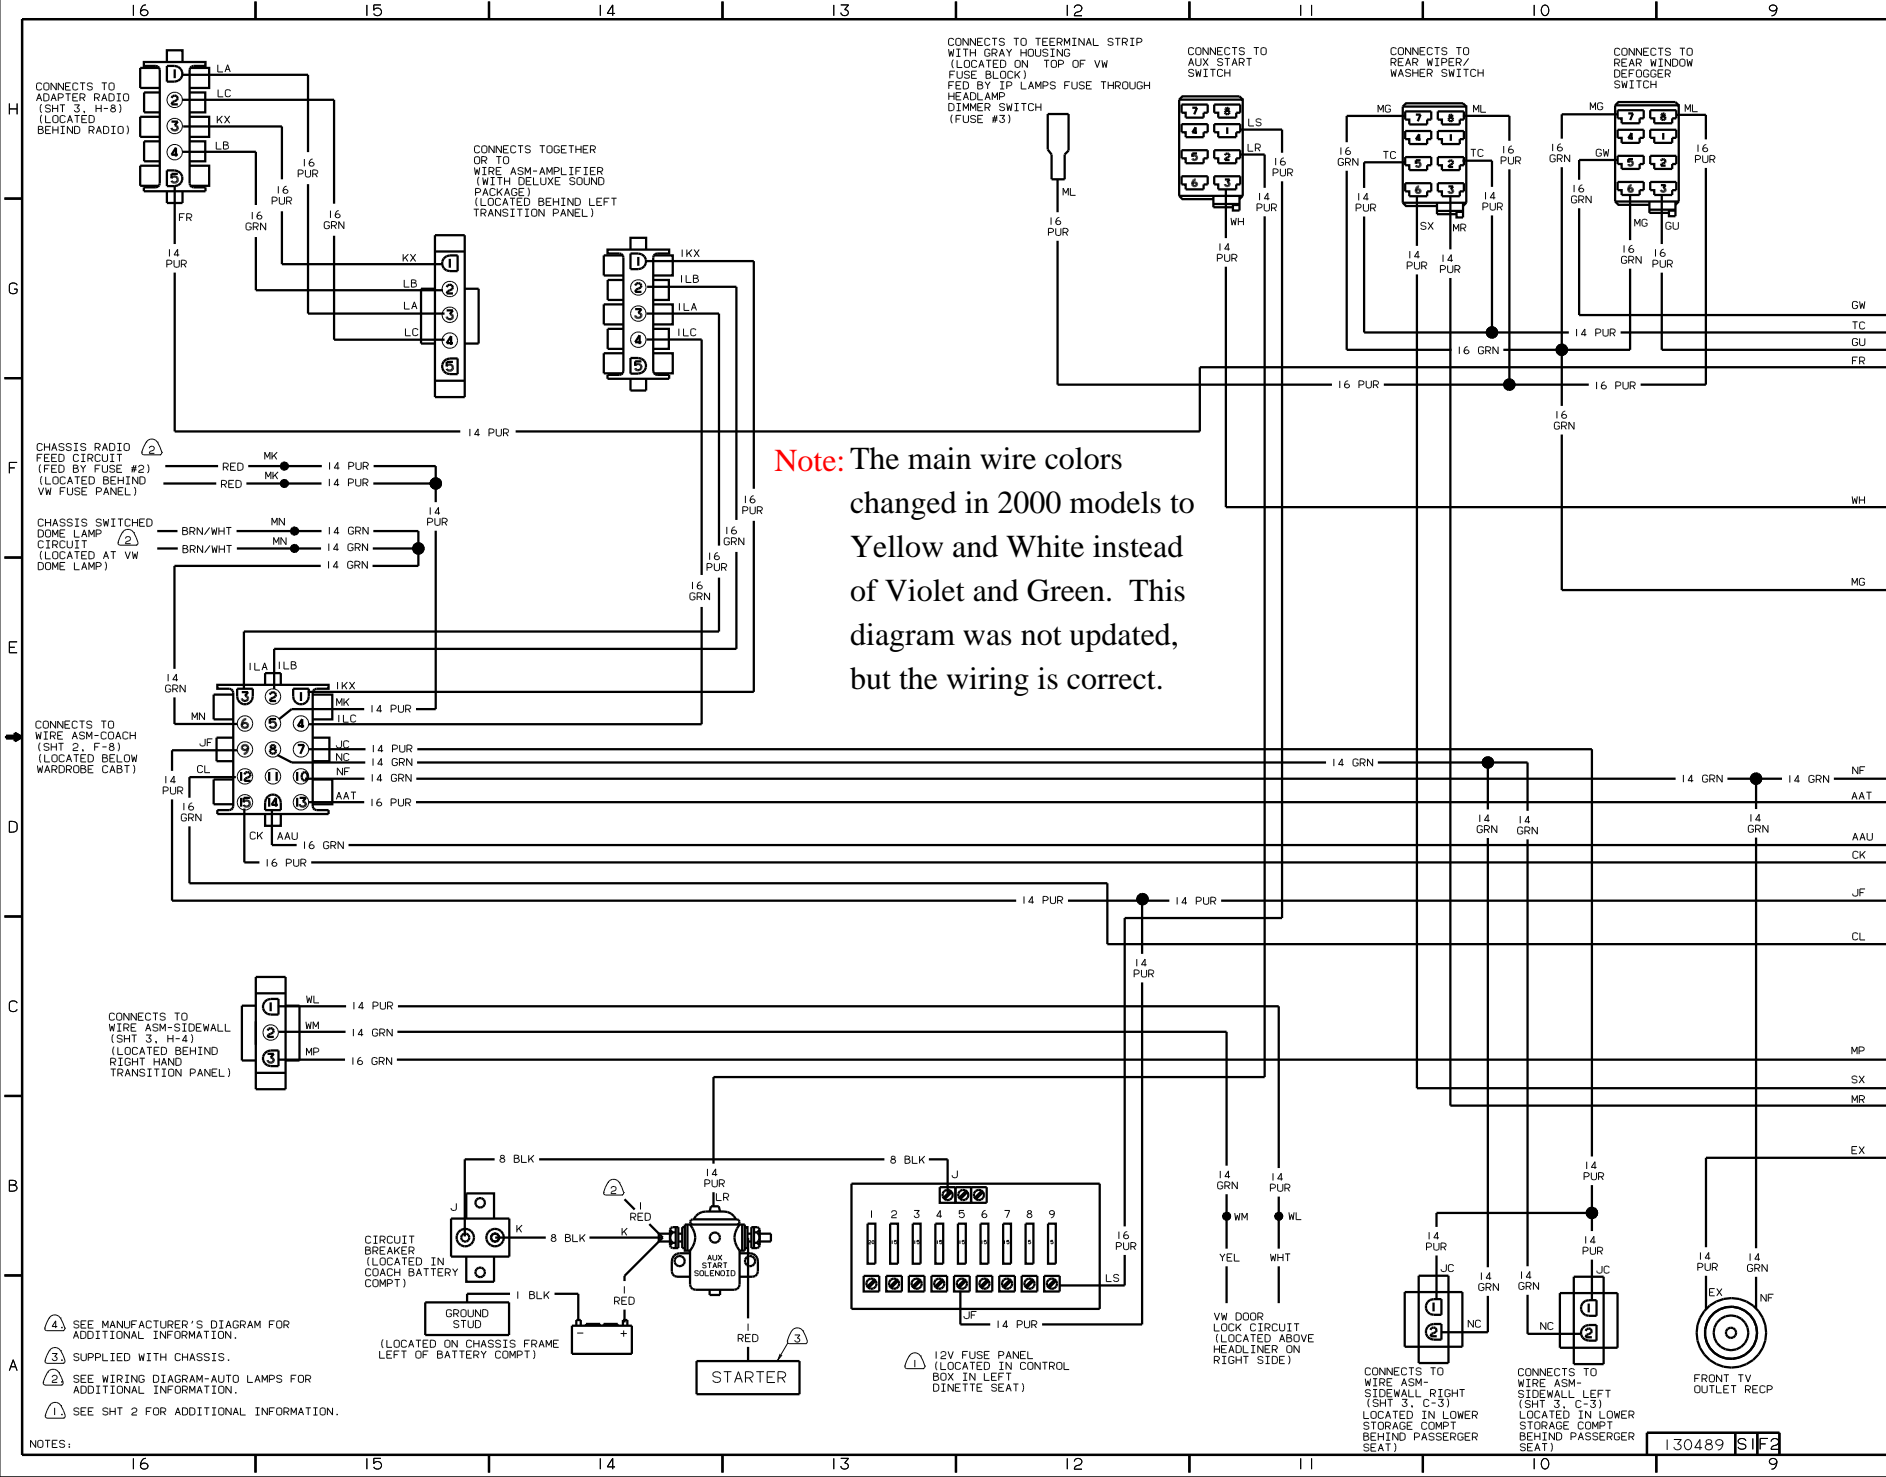

Danger of electrical shock, burns or death. Always remove all power sources before attempting any repair, service or diagnostic work. Power can be present from shore power, generator, inverter or battery. All power sources must be disabled and secured before performing any service.

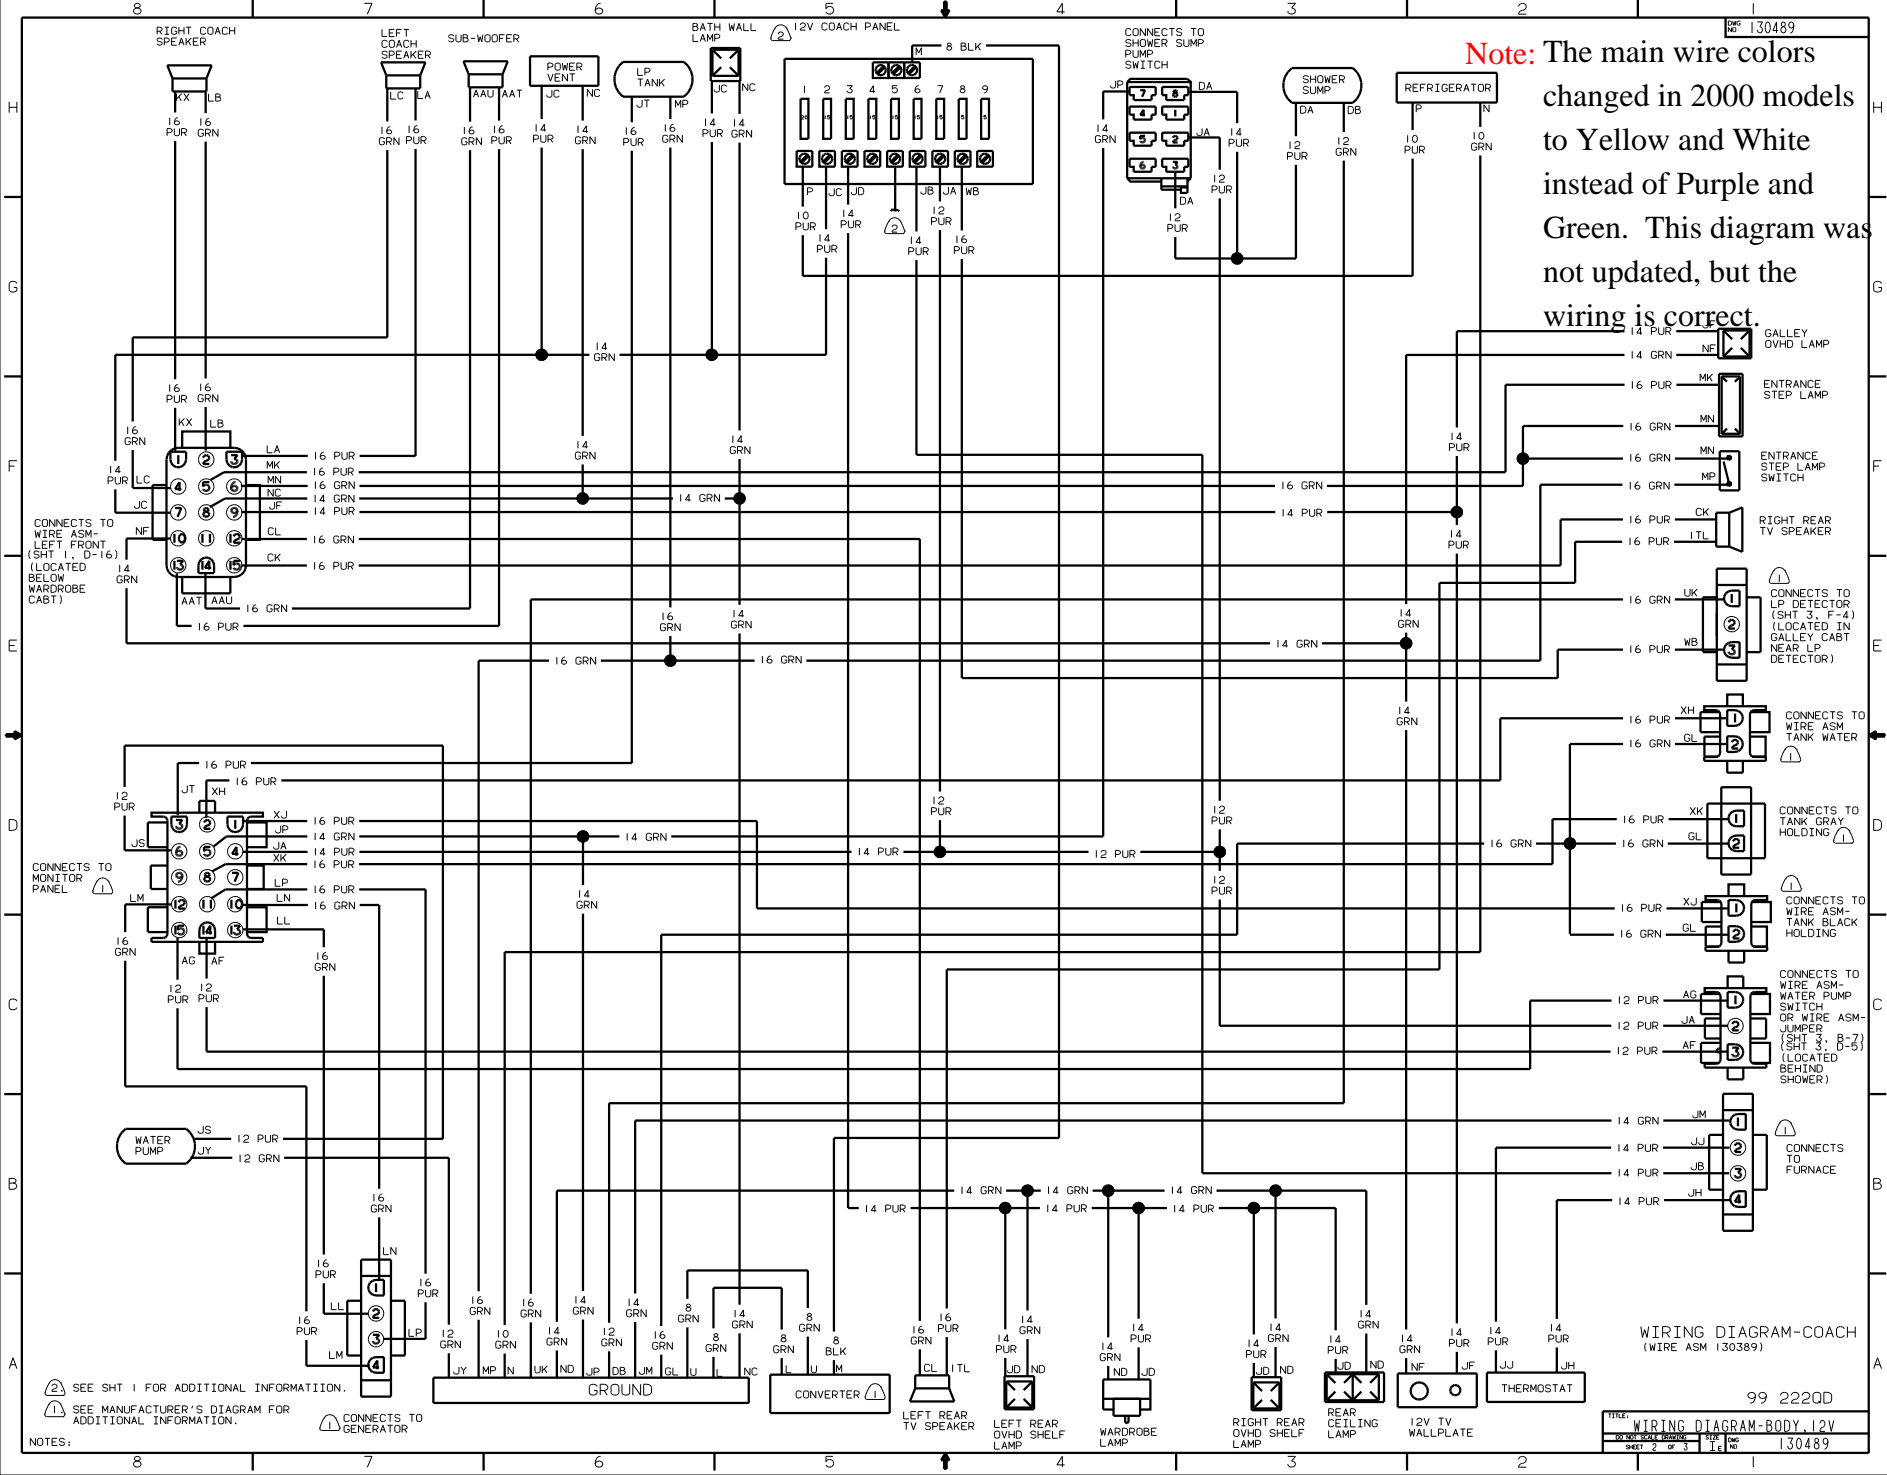

CAUTION

If you lack the skills, tools or equipment to perform diagnostic or repair work leave such work to an authorized Winnebago Industries dealer or other qualified shop.

Note: The main wire colors changed in 2000 models to Yellow and White instead of Purple and Green. This diagram was not updated, but the wiring is correct.

NOTES:
② SEE SHT 1 FOR ADDITIONAL INFORMATION.
① SEE MANUFACTURER'S DIAGRAM FOR ADDITIONAL INFORMATION.
